

Inspirational Lighting Design

for listed and historic homes

This seminar looks at lighting design for listed and historic homes. It examines how technical and regulatory changes are shaping the residential lighting sector and how those technical developments offer new solutions to traditional problems in sensitive buildings. This seminar is both visual and practical with the key themes illustrated via three case studies. Topics covered include:

- The importance of lighting in historic homes
- The changing lighting landscape and technical developments
- The particular challenges of lighting listed and historic buildings
- New technologies, new solutions
- Case studies
 - Lighting a 15th century barn
 - Lighting artwork
 - Lighting the private rooms of a stately home
